In the wake of the tragic school shooting in Uvalde, Texas, the debate over gun control has once again been thrust into the spotlight. But what is the truth about guns? What are the facts about gun violence in the United States? And what are the best ways to reduce gun violence without infringing on the rights of law-abiding citizens?

In his new book, *Control: Exposing the Truth About Guns*, author Dave Kopel provides a comprehensive overview of the history of gun control in the US, the current state of the debate, and the arguments for and against various gun control measures. Kopel, a constitutional law professor at the University of Denver and a research fellow at the Cato Institute, is one of the nation's leading experts on gun control. He has written extensively on the subject and has testified before Congress on multiple occasions.

In *Control*, Kopel argues that the gun control debate is often characterized by misinformation and fear-mongering. He points out that the vast majority of gun owners are law-abiding citizens who use their firearms for legitimate purposes, such as self-defense, hunting, and target shooting. He also argues that the most popular gun control measures, such as gun bans and universal background checks, are ineffective at reducing gun violence.

Instead of focusing on gun control, Kopel argues that we should focus on addressing the root causes of gun violence, such as poverty, mental illness, and lack of opportunity. He also argues that we should focus on enforcement of existing gun laws and on providing more resources for mental health treatment.

Control is a must-read for anyone who wants to understand the complex issue of gun control in the United States. Kopel provides a balanced and informed perspective on the issue, and he offers concrete solutions to the problem of gun violence.
